Bachelor of Economics (S.E) in Development Economics *GPA: 3.59 / 4.00*

National Central University Feb 2018 – Jul 2018
Overseas Academic Programme *Non-Degree*

Publications

Work-in-progress

Manuscript (2026) | Devan Hadrian, Sekar Satiti, and **Christian Siauwijaya** | "*The Unintended Consequences of Policy: Bank Responses to Wholesale Funding Shock in Indonesia*"

Peer-reviewed

The Journal of Politics 88(3) (2026) | Mirko Heinzel, Bernhard Reinsberg, and **Christian Siauwijaya** | "*Understanding Resourcing Trade-offs in International Organizations: Evidence from an Elite Survey Experiment*" | Article: PDF

International organisations increasingly rely on earmarked funding, which creates a trade-off between budgetary gain and quality. Using a pre-registered survey experiment, we evaluate how international organisations' staff view earmarked funding and find bureaucrats prefer earmarking within their own area of work. But this preference does not affect their judgements about the appropriate funding amounts or expected overhead charges for the project.

Review of International Org. (2024) | Bernhard Reinsberg, Mirko Heinzel, and **Christian Siauwijaya** | "*Tracking Earmarked Funding to International Organizations: Introducing the Earmarked Funding Dataset*" | Article: PDF

Our understanding of the drivers and effects of earmarked funding has been limited by the lack of systematic data. To address this gap, we introduce the Earmarked Funding Dataset. The dataset contains 342,812 earmarked aid activities from nearly 50 donors and over 340 international development organisations, spanning from 1990 to 2020.

Global Policy (2024) | Bernhard Reinsberg and **Christian Siauwijaya** | "*Does Earmarked Funding Affect the Performance of International Organizations?*" | Article: PDF

Donors increasingly earmark contributions to international organisations for specific purposes, raising concerns about the operational effectiveness of the organisation. Analysing 64 assessments made by MOPAN (an independent performance assessor for international organisations) across 32 organisations from 2009 to 2021, we find that earmarked funding negatively impacts organisational process performance.

Awards and Scholarships

Highest-graded Dissertation, (Grade: 22/22), University of Glasgow, *Adam Smith Business School* Sep 2021
The Adam Smith Scholarship, (£7,500), University of Glasgow, *Adam Smith Business School* Dec 2019
NCU Scholarship, (£1,000), National Central University, *School of Management* Feb 2018

Academic Service

Reviewer, *Review of International Organizations Journal* Jun 2024
Reviewer, *PLOS ONE Journal* May 2024
